At a pace and place to suit you...

New Landmark Workbook!

Residential Garden Design with Vectorworks Landmark by Tamsin Slatter

At last, the antidote to technical manuals!

“Nemetschek North America, the makers of Vectorworks Landmark, are delighted to announce the release of a book which covers the process of residential garden design using Vectorworks Landmark. Written by Tamsin Slatter, billed as the leading expert on Vectorworks Landmark in the UK, this book will take users from the start of the project - drawing up a site survey or importing site surveys, through managing resources, hard landscaping, planting plans, to 3D perspective drawings, Renderworks and more. Focusing on the traditional flow of a project, this book takes you through the tools you need to know in order to complete a 2D plan and 3D visualisation simultaneously!”

Illustrated in full colour throughout, this book is the ideal reference to have by your computer following your initial product training (with Tamsin and her team of course!)

To order your copy, please send an email confirming the number of copies you would like, together with your billing and delivery address to: tamsin@vectorworks-training.co.uk

Then send a cheque for £75 (including p&p to UK addresses) made payable to **Design Software Solutions Ltd**, to

**Design Software Solutions Ltd,
Rosewood, High Street, Hermitage,
Berkshire, RG18 9RE**

Available to ship from stock now. Visit our website to download the contents page and a sample chapter:

Vectorworks Training

Our training continues to be the popular choice for garden designers and interior designers. We offer one to one, bespoke courses, specifically tailored to your needs. We understand the process you need to go through in order to complete your projects.

We will get you up and running quickly and advise you on the best way to tailor the software to fit your own working methods.

Demand continues to grow and we are expanding. Call Tamsin on **07770 831228** or Adrian on **07775 750027** to book your date.

Training for Beginners or Specialists

We are able to cater for complete beginners, or help you really get “under the covers” with Vectorworks. Whether you want to get up and running quickly, or delve into the depths (or heights!) of 3D, Renderworks, terrain modelling and more, we are here to help.

With strong links to the Nemetschek North America, the home of Vectorworks, we are able to take feedback from our clients and help to influence further development of the product.

Time to make the switch to 3D?

If you've bought Vectorworks Landmark but don't already have Renderworks, now is the perfect time to trade up.

If you're still wondering what Renderworks could do for you, it will allow you to add realistic textures, shadows, reflections, transparency and much, much more to your 3D models. Renderworks will bring them to life! You can also create and customise different artistic rendering styles with Renderworks.

Vectorworks offers the unique ability to work in both 2D and 3D simultaneously, making it the perfect choice for a busy design practice. Without a doubt, 3D visualisations help you to communicate your design to the client and win business.

Call 07770 831228 to get a competitive quote.

“It's like learning to cook with Delia Smith!”

“It's just like having you sitting next to me after my training day.”

Landmark Workbook Contents

The book covers the following:

- Setting up the Drawing Board
- Adding Color and Pattern to Objects
